

THE PETERBORO LOCK

MANUFACTURING CO. LIMITED, PETERBORO, CANADA

CATALOGUE NO. 10

ESTABLISHED 1885

CATALOGUE No. 10

THE PETERBORO LOCK MANUFACTURING COMPANY, LIMITED
OFFICE, FACTORY AND WAREHOUSES: Nos. 186-206 SIMCOE STREET
PETERBORO CANADA

FOREWORD

In 1858 a group of Peterborough citizens organized The Peterboro Lock Mfg. Co. Ltd., the first firm to manufacture locks in Canada.

Down through the years the Company has progressed with the growth of the Dominion and our sales have shown a steady increase from year to year.

Today we have a large modern plant, equipped with the latest tools and machinery to take care of your requirements.

Every effort has been made to present a complete line of high-grade builders' hardware. Slow-selling lines which have become obsolete by the bringing out of better products have been eliminated. Standardization has been aimed at with the object of benefitting the jobber, retailer and consumer.

In presenting you with our new catalogue No. 10, we have broken away from the old-fashioned and cumbersome catalogue of the past.

We trust the new catalogue will meet with your approval and be of great value to you.

**THE PETERBORO LOCK MANUFACTURING COMPANY
LIMITED**

PETERBOROUGH, ONTARIO

Jan. 1, 1951

Payment—Our terms are net 60 days, or 1% cash discount will be allowed for aggregate of purchase in any calendar month if paid on or before the 15th of the succeeding month. All goods sold subject to sight draft 60 days from date of invoice. Interest charged on overdue accounts.

Shipments—We do not guarantee the safe delivery of goods. Our responsibility ceases when the goods are delivered to the transfer company. Shipments are F.O.B. factory.

Orders—All orders subject to prices ruling at date of shipment. Unspecified orders will not be accepted. All orders and contracts subject to strikes, accidents and other causes beyond our control.

Prices—Prices are subject to change without notice. Subject to sales tax if any.

Claims—All claims for shortages, damage in transit, or errors in prices must be reported within ten days.

Broken Packages—Due to close prices prevailing on all lines and the extra expense of putting through small quantities an extra charge of 10% will be made for any order smaller than standard package. Cast brass and bronze, wrought brass and bronze and chrome plated goods not included in this ruling.

Minimum Charge—Due to expense of handling small items we will not render invoice for less than 25c.

Labelling Charge—Due to the extra expense in labelling goods for openings, an extra charge of 5% will be added on goods so labelled on orders amounting to \$250.00 or less.

DESCRIPTION OF FINISHES

SPECIFY FINISH BY ADDING FINISH NUMBER TO GOODS DESIRED

Bronze Metal and Bronze Plate		
Finish No.	Surface	Color
1	Buffed	Natural
4	Dull	Light statuary (dull bronze)
6	Dull	Medium statuary
6S	Sanded	Medium statuary
34	Dull	Dull or light statuary, depressed portion, black oxidized
Brass Metal and Brass Plate		
12	Buffed	Natural
13	Dull	Natural (dull brass)
18	Fine wheel	Natural (ship finish)
19	Dull	Dull, depressed portion, black oxidized
Copper Plate on Brass, Bronze, Iron and Steel		
8	Oxidized and relieved (antique copper)
Nickel Plate on Brass, Bronze, Iron and Steel		
30	Buffed	Natural
31	Dull	Satin finish
GB32	Imitation hammered iron
38	Dull	Dull, depressed portion, black oxidized
Imitation Barff on Brass, Bronze, Steel or Iron		
40	Dull	Black oxidized
Genuine Barff on Cast Iron and Wrought Steel		
41	Sanded	Rustless iron, genuine barff
Chromium Plate on Brass, Bronze, Iron and Steel		
42	Buffed	Natural
43	Dull	Satin finish

Nickelene Metal		
This is an alloy composed of nickel, copper, zinc with high nickel content. It has an advantage over nickel plate of being a uniform color throughout.		
Finish No.	Surface	Color
33	Buffed	Natural
39	Dull	Satin finish
Nicolium Metal		
Sectional Front Door Sets supplied in GB32 are Nicolium Metal. Nicolium is a special nickel alloy giving exactly the same color as hand wrought iron. It is not as high in nickel content as Nickelene and is not recommended where brightness is desired. Finishes well in dull nickel.		
GB32	Imitation hammered iron
23	Dull	Dead black, lustreless iron
Verde Antique on Cast and Wrought Brass and Bronze		
27	Dull	Verde, medium, statuary, relief
Silver Finishes on Cast and Wrought Brass and Bronze		
35	Buffed	Natural
36	Dull	Natural, satin
Gold Finishes on Cast and Wrought Brass and Bronze		
44	Gold	Plated bright
45	Gold	Plated dull
Cast and Wrought Aluminum Metal		
29	Dull	Natural
Miscellaneous		
26	Copper dipped	Dull brass spray
28	Cadmium plate	Aluminum spray
17	Japanned black	Prime coat

LACQUER

The above finishes cover all regular finishes. We are prepared to supply finishes to match other manufacturers or the colouring of metal work, as electric fixtures. Orders for special finishes should be accompanied with samples showing the finish desired. All natural colour or plated finishes, unless otherwise noted have a thin coating of transparent lacquer which is applied to preserve the finish. If goods are wanted without lacquer "N.L." should be suffixed to the finish number when ordering.

PRICES FOR SPECIAL FINISHES QUOTED ON APPLICATION

PETERBORO LABELLING SYSTEM

Above are illustrated types of labels used on our cartons. In order to differentiate between brass and iron goods we find it advisable to use two sets of colours. The blue label is used on goods composed of iron or steel and the red label is used on brass or bronze goods and glass knobs.

A WORD AS TO SERVICE

In compiling this catalogue it has been our endeavour to make it as complete as possible.

To give our customers the very best service it is important that orders received by us contain complete information. Some of the omissions which cause delays in the entering of orders are —

Finish desired.

Length and width of kick plates, etc.

Unit quantities.

Type of strike required on casement fasteners
rim or mortise.

Length of casement adjusters, flush bolts,
transom chains, etc.

Number and name of article.

In addition to the information given above it is important on contract orders to give the thickness of the doors, the hand of the lock, keying instructions, name of the building, quantity of keys for each lock, number of master keys and grand master keys, rabbeted or bevel front, special backset, if required.

It will be noticed we have listed the most popular combinations of locksets. If different knobs or escutcheons are required than standard set we would recommend specifying detail of lock, knobs and escutcheons required.

PETERBORO SAMPLE MOUNTS

We would recommend that every hardware dealer interested in promoting sales in Builders Hardware procure several of these Sample Mounts. Experience has demonstrated that it is an excellent means of displaying goods.

When ordering give list number and finish. For description of finishes, see page 17.

SCREEN SETS AND HINGES

SCREEN DOOR HINGES

No. 231
Planished steel
Size 2½ x 3 inches
Japanned without screws
Packed six pair in a carton

Set No. 0231

SCREEN DOOR HINGE SETS

Set consists of one pair of hinges, complete with screws, one cast iron pull with screws, and one 2½ inch hook and eye as illustrated.

No.	Hinge	Pull	Hook and eye	Finish
0231	231	A-755	2½"	Japanned

SCREEN DOOR CHECK AND CLOSERS AIR CONTROLLED

No. 444—Light type,
Dull brass finish

Wrought brass barrel, 10 x 1¼ inches; cast ends; steel angle bracket for jamb fastening; ½ inch plunger rod with hook end; tempered steel compression spring inside the barrel with steel plunger and leather cupped washer; air vent regulated by valve screw with retaining spring. A special tension spring holds the plunger against the walls of the barrel which gives

even checking resistance. Used on either right or left hand door without any change on mechanism. Closing speed regulated by speed control adjusting screw.

Packed one in a box with screws. Case quantity 1 dozen. Shipping weight 19½ pounds to case.

For doors ⅞ inch to 1½ inch thick, opening out. Reverse bevel bolt. Can be supplied with rim strikes for doors opening in.

Case, steel..... 2½ x 2¼"
Escutcheons, wrought. 3¼ x 1½"
Knob, wrought..... 2"
Lever, cast..... 2"

OPERATION

Latch bolt by knob outside and lever handle inside. Stop on inside sets the latch bolt.

Case, cast iron.. 1⅞ x 1⅞ x ½"
Front..... 3½ x ¾"
Backset..... 1¼"
Escutcheons, wrought. 3¼ x 1½"
Knob, wrought..... 2"
Lever, cast..... 2"

OPERATION

Latch bolt by knob and lever, inside, except when both knob and lever are set by slide stop on inside.

Case, cast iron.. 2¾ x 2⅞ x ½"
Backset..... 1½"
Spacing..... 1¾"
Escutcheons, wrought. 3¼ x 1½"
Knob..... 2"
Lever, cast..... 2"

OPERATION

Latch bolt by knob outside and by lever handle inside, except where both knob and lever are set by slide bolt on inside escutcheon, then key from outside operates.

Note—Locks 201 and 202 have standard spacing and are interchangeable with locks packed with our regular inside sets.

Set No.	Latch No.	Lever	Escutcheons	Knobs

When ordering give list number and finish. For description of finishes see page 17.

LOCK INFORMATION

CONSTRUCTION OF PIN TUMBLER CYLINDERS

Mortise cylinder

Rim cylinder

The sectional cut illustrates the construction of rim and mortise cylinders, with a ball bearing under the first pin that reduces wear and resistance as the key enters the keyway. By the insertion of the key the pins part at the line of division between the plug and cylinder shell, permitting the plug to rotate. A cam at the end of the plug actuates the bolt mechanism of the mortise type of locks, the rim being operated by a connecting bar as shown in cut. The number of changes that may be gotten differing from one another are practically unlimited.

MASTER-KEYED PIN TUMBLER CYLINDERS

An extra set of pins is used, as shown in above cut, so that two different divisions are possible. When change key is inserted the pins are raised so that a division occurs at surface of plug, allowing plug to rotate.

The master-key operates each lock in the system by raising the pins so that a different division occurs at surface of plug, allowing plug to be rotated.

Extra Keys

When extra or duplicate keys are required, we recommend they be ordered to be fitted or cut by us. In this case they will be accurately made, thus insuring a perfectly fitted key.

Types of Locks

CYLINDER LOCKS—The Peterboro cylinder locks supplied with cylinders as described above represent the most secure type of lock made. Changes are practically unlimited. This class of lock is recommended when absolute security is desired.

BIT KEY LOCKS—These are supplied with from one to four tumblers and in some cases side wards or ribs project across the keyhole through which the key must pass. A large number of changes may be secured with our better class locks of this type and a considerable degree of security obtained. The cheaper locks, as the price would indicate have few key changes.

Master-keyed Locks

The advantage to the owner or occupant of a building in having one key to operate all the rooms is so obvious that this system of keying is very popular. Our cylinder locks and better class of bit key locks are especially adapted to this class of work and every care is taken in the assembling of the locks. A record is kept of the keying system and if extensions are being made, in the future, to a building equipped with our master-keyed locks, additional ones may be secured without trouble.

Cylinder locks lend themselves readily to a master-keyed system. As the changes are practically unlimited, these locks can be made up into a large number of sets, the sets consisting of as many locks as are required with a master-key to pass each set. If desired, they can be furnished with a grand master-key to pass any number or all of the sets mentioned.

Block System

On large buildings or institutions where locks are required set up by floors, or groups of buildings, if desired we can supply a "Block System". With this system we can supply six different groups, where the keys of any one group will not enter the keyway of another group.

The cylinders of each group may be master-keyed and grand master-keyed and in addition a great grand master-key can be supplied to pass any or all of the six different groups.

When supplying one of these special keyways on a particular job, no blank keys will be supplied, thereby insuring owner against any duplicate keys being cut unauthorized.

Apartment House Cylinder System

Under this system, one or more of the entrance door locks are assembled, subject to the keys of all the other locks in the building. For example, the locks of the various apartments may be alike or different. The lock on the entrance door or doors is so arranged that the regular or change keys of the apartment will act as a master-key upon the entrance doors. Ten sets of fifty locks each, all different, arranged as above, can be furnished, if required.

Master-keyed Bit Key Locks

Locks of the 114, 268, 636, 638, 638H, 640, 744, type are examples of the better class that can be master-keyed with sufficient security to warrant the purchase of same, every care being taken to make them as near equal to the pin tumbler locks as possible, though we advise the purchase of the latter when security is an absolute feature.

STANDARDIZED LOCKS

In order to enable the manufacturer of hollow metal doors to use uniform sized locks we have made up a number of our mortise latches, cylinder dead locks, cylinder vestibule locks and other types of locks with uniform front, strike, case and back-set as per dimensions given in diagram. The locks have bevelled face $\frac{1}{8}$ inch in 2 inches.

In the list given below covering various locks we have added the letters "HM" for hollow metal to the lock numbers.

Mortise Knob Latches	
No.	Description
6HM	Latch operated by knobs both sides. Same size as illustrated above.
Cylinder Mortise Dead Locks	
703HM	Dead bolt by key both sides. Same size as illustrated above.
704HM	Dead bolt by key from outside by turn inside. Same size as illustrated above.
705HM	Dead bolt by key one side only. Same size as illustrated above.
Mortise Cylinder Latches	
764HM	Same size as illustrated above.
Mortise Cylinder Locks	
765HM	Same size as illustrated above.
763HM	Same size as illustrated above.

TEMPLATE HARDWARE

We are prepared to furnish goods to template for hollow metal work. Goods will be furnished with machine screws and the letters "TMS" should follow the number of each item. When locks and latches are made to template they should always be furnished with box strikes if strikes are required.

Interkeying locks and latches. Locks and latches which can be master-keyed in sets and controlled by one master-key or grand master-key.

Cylinder keys Class No. 109 and No. 110

Locks—Cylinder locks of all types, including cylinder dead locks, mortise cylinder night latches, rim night latches and cylinder padlocks.

Bit Keys Class No. 38 and No. 39

Locks—Nos. 638H, 639H, 640H, 641H, 67, 68, 289, 290, 744, 745, 54H, 55H.

Bit Keys Class No. 37

Locks—Nos. 54, 55, 638, 269, 114, 119, 640, 641.

GENERAL INFORMATION

Door with Bevelled Astragal

Door with Bevelled Astragal

Door with Regular Bevel 1/8 inch in 2 inches

Sketch 1, section of door stile, shows 3 1/2 inches space in the clear, on the OUTSIDE, and 4 1/2 inches on the inside. Distance from centre of bevel to centre of space in the clear is equal on both sides of doors.

Astragal X is sometimes used on both sides of the doors, and of such form as to cause the stiles on same side of doors to show an unequal width of space. (Sketch 2).

Astragals or staff-beads, X-Y, vary greatly in width and form, X often being merely a strip nailed on one side of the doors, and not always centrally over the opening, thus making the clear space on the stiles of different widths. (Sketch 3).

BEVEL FRONT LOCKS

Illustration shows how to determine the bevel of the door. The regular bevel is 1/8 inch in 2 inches.

Bevelled front locks are not reversible and orders should specify the hand.

RABBETED FRONT LOCKS

In describing rabbeted locks we give both the short and long side measurement: Thus 2 1/4 inches and 2 3/4 inches. The first measurement is the distance on the short side, the second the long side measurement, thereby indicating the depth of rabbet as per illustration above.

HAND OF DOORS

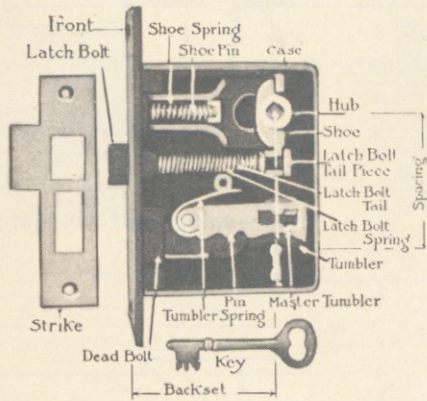

CUPBOARD AND BOOK-CASE LOCKS as illustrated

REGULAR DOOR LOCKS

LOCK PARTS AND REPAIRS

Illustrated to the left is a mortise lock with parts. In ordering lock repairs it is advisable to forward the old parts. This enables us to determine what parts are required and also arrive at the cause of the defects.

Combined cylinder plate and indicator

765	8 x $1\frac{1}{8}$ "	Cast brass	2 $\frac{3}{4}$ "	3 $\frac{3}{8}$ "	One	0179	110

765 Operation—Latch bolt by knobs from either side and by key from outside. Dead bolt by key from outside and by turn piece from inside. Outer knob may be set by stop in face of lock.

764 Operation—Latch bolt by knobs from either side and by key from outside. Outer knob may be set by stop in face of lock.

763 Operation—Latch bolt by knobs from either side. Dead bolt by key from outside and by turn piece from inside.

Master keying—May be master-keyed and grand master-keyed with other Peterboro cylinder locks.

NOTE—No. 765 and 763 can also be supplied with two cylinders.

MORTISE CYLINDER KNOB LOCKS

For use on Doors with narrow stiles, French Windows, Gates, and Grill Doors

Ball Bearing Cylinders

Japanned iron case— $6\frac{3}{8} \times 2\frac{5}{8} \times \frac{3}{4}$ inches

No. 762

No.	Front	Backset	Spacing	Bronze hub for swivel spindle
762	8 $\frac{5}{8}$ x $1\frac{1}{8}$ "	1 $\frac{5}{8}$ "	4 $\frac{1}{4}$ "	$\frac{5}{16}$ "

Operation 762—Latch bolt by knobs from either side, both bolts from outside by key at all times, and dead bolt by turn piece from inside. Outside knob is locked by stop in face of lock.

NOTE: Can also be supplied with two cylinders.

Master keying—May be master-keyed and grand master-keyed in sets as desired with other Peterboro cylinder locks.

See Figure F, Page 50

Reversible, Easy Spring Latch Bolt

No.	Front and bolts	Cylinder	Turnpiece	Three keys
762	Cast brass	One	0179	110

When ordering give list number and finish. For description of finishes, see page 17.

MORTISE CYLINDER KNOB LOCK FOR FIRE EXIT AND OFFICE DOORS

Ball Bearing Cylinder

Japanned iron case— $5\frac{3}{4} \times 3\frac{3}{8} \times \frac{3}{4}$ inches

Front..... $7\frac{1}{2} \times 1\frac{1}{8}$ " Spacing..... $3\frac{3}{8}$ "
Backset..... $2\frac{3}{4}$ " Brass hub for swivel spindle..... $\frac{5}{16}$ "
Keys.....Nickel silver

Operation—Inside knob is always free to operate the lock. Outside knob is always rigid. Operated from outside only by key.

Master-keying—May be master-keyed and grand master-keyed in sets as desired with other Peterboro cylinder locks.

Nos. 773

Reversible—Easy Spring Latch Bolt				
No.	Front and bolts	Cylinder	Changes	Three keys
773	Cast brass	One	Unlimited	110

MORTISE CYLINDER KNOB LATCH FOR VESTIBULE, APARTMENT AND OFFICE DOORS

Japanned iron case— $5\frac{3}{4} \times 3\frac{3}{8} \times \frac{3}{4}$ inches

Front..... $8 \times 1\frac{1}{8}$ " Spacing..... $3\frac{3}{8}$ "
Backset..... $2\frac{3}{4}$ " Brass hub for swivel spindle..... $\frac{5}{16}$ "
Keys.....Nickel silver

Operation—Latch bolts by knobs from either side and by key from outside except when outer knob is set by stops in face of lock then by key outside and knob inside. Turn piece on inside dead locks against all keys.

Master-keying—May be master-keyed and grand master-keyed in sets as desired, with other Peterboro cylinder locks.

No. 864

Reversible—Easy Spring Latch Bolt				
No.	Front and bolts	Cylinder	Changes	Three keys
864	Cast brass	One	Unlimited	110
Rabbeted Front—Not Reversible				
864R	Cast brass	One	Unlimited	110

State thickness of door for which locks are required. Can be supplied with bevel front. Specify hand.

MORTISE CYLINDER KNOB LOCKS FOR SCHOOLS AND OFFICE DOORS

Ball Bearing Cylinder

Japanned iron case— $5\frac{1}{2} \times 3\frac{1}{2} \times \frac{3}{4}$ inches

Front..... $7\frac{1}{2} \times 1\frac{1}{4}$ " Spacing..... $3\frac{1}{2}$ "
Backset..... $2\frac{1}{2}$ " Brass hub for swivel spindle..... $\frac{5}{16}$ "
Keys.....Nickel silver

Not reversible

Operation

No. 766—Two cylinders. Latch bolt by knobs from either side except when outside knob is set by master-key through inside cylinder. Then by key only from outside. Trigger latch automatically locks latch bolt so it cannot be retracted when door is closed. This does not prevent latch bolt from being operated by knobs or key. Change key will not operate inside cylinder unless so specified.

No. 767—One cylinder. Latch bolt by knob from either side except when outside knob set by master-key through outside cylinder. By key from outside at all times. Trigger latch automatically locks latch bolt so it cannot be retracted when door is closed. Inside knob always operative.

Master-keying—May be master-keyed and grand master-keyed in sets if desired with other Peterboro cylinder locks. Specify hand in No. 766 and 767.

Nos. 766, 767

No.	Front and bolts	Cylinder	Changes	Three keys
766	Cast brass	2	Unlimited	110
767	Cast brass	1	Unlimited	110

MORTISE CYLINDER KNOB LOCK

Japanned iron case— $5\frac{3}{8} \times 3\frac{1}{2} \times \frac{3}{4}$ inches

Front..... $7\frac{3}{4} \times 1\frac{1}{8}$ " Spacing..... $3\frac{1}{4}$ "
Backset..... $2\frac{1}{2}$ " Brass hub for swivel spindle..... $\frac{5}{16}$ "
Keys.....Nickel silver

Not reversible

Operation

No. 761—Latch bolt by knobs from either side. Outer knob may be set by stops in face of lock. By key from outside, inside knob always operative. Trigger latch automatically locks latch bolt so it cannot be retracted when door is closed. This does not prevent latch bolt from being operated by knobs or key.

No. 761

No.	Front and bolts	Cylinder	Changes	Three keys
761	Cast brass	1	Unlimited	110

When ordering give list number and finish. For description of finishes, see page 17.

MORTISE CYLINDER KNOB LOCKS—ANTI-FRICTION LATCH FOR FRONT DOORS

No. A765

Ball Bearing Cylinders

Japanned iron case— $5\frac{3}{4} \times 3\frac{7}{8} \times \frac{3}{4}$ inches

Front..... $8 \times 1\frac{1}{8}$ " Spacing..... $3\frac{5}{8}$ "
Backset..... $2\frac{3}{4}$ " Brass hub for swivel spindle..... $\frac{5}{16}$ "
Keys.....Nickel silver

Operation—Latch bolt by knobs from either side and key from outside. Dead bolt by key from outside and by turn piece from inside. Outer knob may be set by stops in face of lock.

NOTE—Can also be supplied with two cylinders.

Master-keying—May be master-keyed and grand master-keyed in sets as desired, with other Peterboro cylinder locks.

Reversible			
Front and bolts	Cylinders	Changes	Three keys
Cast brass	One	Unlimited	110

MORTISE CYLINDER KNOB LATCH FOR VESTIBULE AND OFFICE DOORS

No. A764

See Figure G, Page 50

Japanned iron case— $5\frac{5}{8} \times 3\frac{1}{2} \times \frac{3}{4}$ inches

Front..... $7\frac{5}{8} \times 1\frac{1}{8}$ " Spacing..... $3\frac{1}{4}$ "
Backset..... $2\frac{1}{2}$ " Brass hub for swivel spindle..... $\frac{5}{16}$ "
Keys.....Nickel silver

Operation—Latch bolt by knobs from either side and key from outside. Outer knob may be set by stops in the face of lock. Trigger latch automatically locks latch bolt so it cannot be retracted when door is closed. This does not prevent latch bolt from being operated by knobs or key.

Master-keying—May be master-keyed and grand master-keyed in sets as desired, with other Peterboro cylinder locks.

Not Reversible—Specify Hand			
Front and bolts	Cylinders	Changes	Three keys
Cast brass	One	Unlimited	110

MORTISE CYLINDER KNOB LATCH FOR SCHOOL, APARTMENT AND OFFICE DOORS

No. A768

Japanned iron case— $5\frac{1}{2} \times 3\frac{1}{2} \times \frac{3}{4}$ inches

Front..... $7\frac{1}{2} \times 1\frac{1}{4}$ " Spacing..... $3\frac{1}{2}$ "
Backset..... $2\frac{1}{2}$ " Brass hub for swivel spindle..... $\frac{5}{16}$ "
Keys.....Nickel silver

Operation—Latch bolt by knob from either side except when outside knob is set by master-key through the inside cylinder, then by regular key outside and knob inside. Change key will not operate inside cylinder unless ordered this way. Trigger latch automatically locks latch bolt so it cannot be retracted when door is closed. This does not prevent latch bolt from being operated by knobs or key.

Master-keying—May be master-keyed and grand master-keyed in sets as desired, with other Peterboro cylinder locks.

Not Reversible			
Front and bolts	Cylinders	Changes	Three keys
Cast brass	Two	Unlimited	110

When ordering give list number and finish. For description of finishes see page 17.

MORTISE HOTEL LOCKS — NOT REVERSIBLE

Ball Bearing Cylinder

Japanned iron case—6 x 3 $\frac{3}{8}$ x 1 inch

Front.....8 $\frac{1}{8}$ x 1 $\frac{1}{4}$ " Spacing.....3 $\frac{3}{8}$ "
Backset.....2 $\frac{3}{4}$ " Bronze hub for swivel spindle... $\frac{3}{16}$ x $\frac{3}{8}$ "
Keys.....Nickel silver

Trigger latch automatically locks the latch bolt so it cannot be retracted when door is closed. This does not prevent the latch bolt from being operated by knobs or key. Outside knob always rigid. Furnished with indicator if desired.

Operation

No. 866—Latch bolt by guest, master, grand master and emergency key from the outside. Outside knob is always rigid.

Dead bolt by guest key from the inside. When dead bolt is thrown from the inside all keys are inoperative from the outside, except emergency key.

Dead bolt is operated from the outside by emergency key only. This acts as shut out making all other keys inoperative.

Emergency key operates at all times. Inside knob operates latch from inside.

No. 867—Same function as No. 866 except there is no cylinder inside, dead bolt being operated by a turn from inside instead of key.

No. 868—Same as No. 866 but without trigger latch.

No. 869—Same as No. 867 but without trigger latch.

Nos. 866, 869

No.	Fronts and bolts	Thumb knob cast bronze	Cylinders	Keys	Changes
866	Cast bronze, polished	Without	Two M 2	Three	Unlimited
867	Cast bronze, polished	No. 7179	One M 2	Three	Unlimited
868	Cast bronze, polished	Without	Two M 2	Three	Unlimited
869	Cast bronze, polished	No. 7179	One M 2	Three	Unlimited

Master-keyed and grand master-keyed with other Peterboro cylinder locks.

MORTISE HOTEL LOCKS — NOT REVERSIBLE

Japanned iron case—6 x 3 $\frac{3}{8}$ x 1 inch

Front.....8 $\frac{1}{8}$ x 1 $\frac{1}{4}$ " Spacing.....3 $\frac{3}{8}$ "
Backset.....2 $\frac{3}{4}$ " Bronze hub for swivel spindle... $\frac{3}{16}$ x $\frac{3}{8}$ "
Keys.....Nickel silver

Operation

No. 870—Latch bolt by knob from either side and by guest key, master and grand master and emergency key from the outside. Outside knob is locked by stops in face.

Dead bolt by guest key from inside. When dead bolt is thrown from the inside all keys are inoperative from the outside except the emergency key.

When dead bolt is operated from the outside by emergency key only, this acts as a shut out, making all other keys inoperative. Emergency key operates at all times. Inside knob operates latch from inside.

No. 871—Same function as No. 870 except there is no cylinder inside, dead bolt being operated by turn from inside instead of key.

No. 872—Same as No. 870 but with trigger latch which automatically locks the latch bolt so it cannot be retracted when door is closed.

No. 873—Same as No. 871 but with trigger latch which automatically locks the latch bolt so it cannot be retracted when door is closed.

Nos. 870, 873

No.	Fronts and bolts	Thumb knob cast bronze	Cylinders	Keys	Changes
870	Cast bronze, polished	Without	Two M 2	Three	Unlimited
871	Cast bronze, polished	No. 7179	One M 2	Three	Unlimited
872	Cast bronze, polished	Without	Two M 2	Three	Unlimited
873	Cast bronze, polished	No. 7179	One M 2	Three	Unlimited

Master-keyed and grand master-keyed with other Peterboro cylinder locks.

When ordering give list number and finish. For description of finishes, see page 17.

MORTISE HOTEL LOCKS — NOT REVERSIBLE

Ball Bearing Cylinder

Japanned iron case—6 x 3 $\frac{3}{8}$ x 1 inch

Front.....8 $\frac{1}{8}$ x 1 $\frac{1}{4}$ " Spacing.....3 $\frac{3}{8}$ "

869	Cast bronze, polished	No. 7179	One M 2	Three	Unlimited

Master-keyed and grand master-keyed with other Peterboro cylinder locks.

MORTISE HOTEL LOCKS — NOT REVERSIBLE

Japanned iron case—6 x 3 $\frac{3}{8}$ x 1 inch

Front.....8 $\frac{1}{8}$ x 1 $\frac{1}{4}$ " Spacing.....3 $\frac{3}{8}$ "
Backset.....2 $\frac{3}{4}$ " Bronze hub for swivel spindle... $\frac{3}{16}$ x $\frac{3}{8}$ "
Keys.....Nickel silver

Operation

No. 870—Latch bolt by knob from either side and by guest key, master and grand master and emergency key from the outside. Outside knob is locked by stops in face.

Dead bolt by guest key from inside. When dead bolt is thrown from the inside all keys are inoperative from the outside except the emergency key.

When dead bolt is operated from the outside by emergency key only, this acts as a shut out, making all other keys inoperative. Emergency key operates at all times. Inside knob operates latch from inside.

No. 871—Same function as No. 870 except there is no cylinder inside, dead bolt being operated by turn from inside instead of key.

No. 872—Same as No. 870 but with trigger latch which automatically locks the latch bolt so it cannot be retracted when door is closed.

No. 873—Same as No. 871 but with trigger latch which automatically locks the latch bolt so it cannot be retracted when door is closed.

Nos. 870, 873

No.	Fronts and bolts	Thumb knob cast bronze	Cylinders	Keys	Changes
870	Cast bronze, polished	Without	Two M 2	Three	Unlimited
871	Cast bronze, polished	No. 7179	One M 2	Three	Unlimited
872	Cast bronze, polished	Without	Two M 2	Three	Unlimited
873	Cast bronze, polished	No. 7179	One M 2	Three	Unlimited

Master-keyed and grand master-keyed with other Peterboro cylinder locks.

When ordering give list number and finish. For description of finishes, see page 17.

MORTISE, 5 PIN TUMBLER TUBULAR CYLINDER DEAD LOCK REVERSIBLE

Operation—Outside by key; inside by turn knob.

Insert on Page 59

No. 4501

Front.....	Wrought brass 1 1/16" x 2 1/2"
Strike.....	Wrought steel 1 1/8" x 2 1/4"
Backset.....	2 3/8"
Case.....	Die cast, diameter 1", length overall 3 1/16"
For Doors.....	1 3/8" to 2"
Bolt.....	Forged brass
Cylinder.....	Brass—5 pin tumblers
Cylinder Ring.....	Wrought brass
Turn Knob.....	Die cast—plate wrought brass 2 5/8" diameter

Can be master-keyed and grand master-keyed with other Peterboro cylinders.

MORTISE DEAD LOCKS — BALL BEARING CYLINDERS

Nos. 700-702

Japanned iron case— $2\frac{3}{8} \times 3\frac{1}{2} \times \frac{3}{4}$ inches.

Front..... $4\frac{1}{8} \times 1"$ Rabbet backset..... $2\frac{3}{4} \times 2\frac{1}{4}"$
Backset..... $2\frac{3}{4}"$ Keys.....Nickel silver

Operation

No. 700—Dead bolt by key from either side.
No. 701—Dead bolt by key from outside; by turn piece from inside.
No. 702—Dead bolt by key from one side only.

See figure H, page 50.

Reversible				
No.	Front and bolt	Cylinders	Turn piece	Two keys

290MK	Cast bronze	Cast brass	3	300	38

When ordering give list number and finish. For description of finishes, see page 17.

MORTISE FRONT DOOR LOCKS — REVERSIBLE, WITHOUT NIGHT WORKS

Nos. 237, 240

Japanned iron case— $4\frac{3}{8} \times 3\frac{3}{8} \times \frac{3}{4}$ inches
 Front..... $6\frac{3}{4} \times 1$ " Spacing..... $2\frac{5}{8}$ "
 Backset..... $2\frac{3}{4}$ " Iron hub for spindle..... $\frac{3}{16}$ "
 Key.....Nickel plated steel

Easy Spring Latch

No.	Wrought front	Bolts	Tumblers	Changes	One key
237	Steel	Iron, plated	1	48	37
240	Brass	Cast brass	1	48	37

MORTISE FRONT DOOR LOCKS — REVERSIBLE, WITH NIGHT WORKS

See Figure K, Page 50.

Japanned iron case— $4\frac{3}{8} \times 3\frac{3}{8} \times \frac{3}{4}$ inches
 Front..... $6\frac{3}{4} \times 1$ " Spacing..... $2\frac{5}{8}$ "
 Backset..... $2\frac{3}{4}$ " Iron hub for spindle..... $\frac{3}{16}$ "
 Keys.....Solid steel, nickel plated

Operation

Latch bolt by knobs from both sides, except when stop is set in face of lock. Key operates both latch and dead bolt.

Reversible, Easy Spring Latch Bolt

No.	Wrought front	Bolts	Changes	Two keys
236	Brass	Cast bronze	48	37
346	Steel	Cast iron, plated	48	37

MORTISE SCHOOL HOUSE LOCKS

Nos. 744, 745

Japanned iron case— $5\frac{1}{2} \times 3\frac{3}{4} \times \frac{5}{8}$ inches
 Front..... $7\frac{3}{8} \times 1\frac{1}{16}$ " Spacing..... $2\frac{3}{8}$ "
 Backset..... $2\frac{3}{4}$ " Brass hub for swivel spindle..... $\frac{3}{16}$ "
 Keys.....Extra heavy steel—N.P.

Operation

No. 744—Latch bolt by knob from inside at all times and by knob from outside except when latch bolt is locked by key. Then by key from outside. Trigger latch, for which there is no opening in strike, automatically safeguards latch bolt and prevents manipulation of bolt when door is closed. Not reversible.

No. 745—Same as No. 744 but has no trigger latch. Reversible. Not illustrated.

No.	Front and bolts	Tumblers	Changes	One key
744	Cast brass	3	1500	39
745	Cast brass	3	1500	39

REVERSIBLE RABBETED MORTISE KNOB LOCKS

Nos. 268, 269MK

Japanned iron case— $3\frac{3}{8} \times 3\frac{1}{8} \times \frac{5}{8}$ inches
 Front..... $5\frac{1}{2} \times 1$ " Spacing..... $2\frac{3}{16}$ "
 Backset..... $2\frac{1}{8} \times 2\frac{3}{8}$ " Iron hub for spindle..... $\frac{3}{16}$ "
 Key.....Nickel plated steel

Master-keying

No. 269MK—Master-keyed in one set of 300 all different, with master-key to pass all, or in sets as desired, with master-key to pass each set and grand master-key to pass all. Master-keyed with other locks having same class master-key.

Reversible, Easy Spring Latch

No.	Front and bolts	Tumblers	Changes	One key	Master key
268	Cast brass	1	60	37	Without
269	Cast brass	3	300	37	Without
269MK	Cast brass	3	1500	37	37

This lock has the same standard spacing of locks packed with inside sets and can be interchanged with any inside door escutcheon taking Nos. 106, 638, or a similar line of locks. It is reversed by removing the screws that hold the front on case and reversing both latch bolt and front.

When ordering give list number and finish. For description of finishes, see page 17.

When ordering give list number and finish. For description of finishes, see page 17.

SLIDING DOOR LOCKS

No. 31

Japanned iron case—3 x 3½ x ¾ inches
 Front.....5¼ x 1¾" Backset.....2⅝"
 Keys.....Nickel plated steel
 Operation—Bolt operated by key from both sides.

No.	Fronts and bolts	Tumblers	One key
31	Cast brass	3	38

If desired solid bow key No. 39 can be supplied.

Nos. 2160, 2165

Ball bearing cylinder

Japanned iron case—2⅝ x 3½ x ¾ inches
Ball Bearing Cylinder
 Front.....4⅞ x 1" Backset.....2¾"
 Keys.....Nickel silver

Master-keying

May be master-keyed and grand master-keyed with other Peterboro cylinder locks.

Operation

No. 2160—Operated from one side only by keys.

No. 2165—Operated from both sides by keys.

No.	Fronts and bolts	Cylinders	Changes	Three keys
2160	Cast bronze	1	Unlimited	110
2165	Cast bronze	2	Unlimited	110

Any of our cup escutcheons may be fitted to the above locks.

Nos. 2162, 2163

Japanned iron case—6¾ x 5½ x 1⅞ inches
Ball Bearing Cylinder
 Backset.....3¾" Spacing.....2⅝"
 Front.....1⅝ x 9⅝"
 Width of case—1¾ inches more than backset.

Operation

Latch bolt by drop handle from inside, and by cylinder from outside.

No.	Front and bolts	Doors	Cylinder	Changes	Three keys
2162	Cast bronze	Single	One	Unlimited	110
2163	Cast bronze	Double	One	Unlimited	110

Nos. 2164, 2165½

Japanned iron case—5½ x 3½ x ¾ inches
Ball Bearing Cylinder
 Front.....7½ x 1¼" Backset.....2¾"
 Keys.....Nickel silver

Master-keying

May be master-keyed and grand master-keyed with other Peterboro cylinder locks.

Operation—Bolt operated by key from both sides.

No.	Front and bolts	Doors	Cylinders	Changes	Three keys
2164	Cast bronze	Single	2	Unlimited	110
2165½	Cast bronze	Double	2	Unlimited	110

When ordering give list number and finish. For description of finishes, see page 17.

MORTISE LATCHES

FOR STORE, APARTMENT AND FIRE EXIT DOORS

No. 620

Japanned case

No. 620..... $3\frac{5}{8}$ x 3 x 1" Backset..... $2\frac{1}{2}$ "
Front..... $5\frac{3}{16}$ x $1\frac{1}{4}$ "

Reversible—Easy Spring Latch Bolt

No.	Front	Bolt
620	Brass	Bronze

No. 620A

Japanned iron case

No. 620A..... $3\frac{5}{8}$ x 3 x 1" Backset..... $2\frac{1}{2}$ "
Front..... $5\frac{3}{16}$ x $1\frac{1}{4}$ "

Operation

By exit bar, thumb piece, or push lever from inside only at all times. Auxiliary latch automatically locks latch bolt, so that it cannot be forced back when door is closed; but does not prevent exit bar from operating latch bolt.

Reversible—Easy Spring Latch Bolt

No.	Front	Bolt
620A	Brass	Bronze

MORTISE LATCH FOR INTERIOR DOORS

Japanned iron case— $3\frac{1}{8}$ x $2\frac{1}{4}$ x $\frac{3}{8}$ inches

Front..... $3\frac{3}{4}$ x $\frac{7}{8}$ " Backset..... $2\frac{3}{8}$ "

No. 630

Reversible—Easy Spring Latch

No.	Front	Bolt
630	Brass	Brass

The above latch is particularly suitable for inside sectional handle lock sets.

Japanned iron case—4 x $3\frac{1}{4}$ x $\frac{3}{4}$ inches

Backset..... $2\frac{3}{8}$ " Front..... $6\frac{1}{4}$ x $1\frac{1}{8}$ "
Spacing..... $2\frac{3}{4}$ "

Operation

No. 652—Latch bolt by thumb piece from outside, by knob from inside.

No. 653—Latch bolt by thumb piece or panic bar from inside, by knob from outside.

No. 652, 653

Reversible—Easy Spring Latch Bolt

No.	Front	Bolt
652	Brass	Bronze
653	Brass	Bronze

Packed one in a box with screws.

When ordering give list number and finish. For description of finishes, see page 17.

MORTISE KNOB LATCHES

Above latches packed one dozen in a box, with screws.

When ordering give list number and finish. For description of finishes, see page 17.

LATCHES

PETERBORO

RIM CYLINDER NIGHT LATCHES

Nickel Silver Keys. Cast Brass Cylinders for Doors— $\frac{7}{8}$ inches—3 inches
Ball Bearing Cylinders

Nos. 100, 101

Cast iron case— $3\frac{1}{2} \times 2\frac{3}{4} \times 1$ inch

Backset..... $2\frac{1}{2}$ "

Operation

From outside by key. From inside by knob. Bolt may be held back by stop.

Note—Latches No. 100 and No. 101 can be supplied with drawback knob on inside.

If desired this way affix "D" to number, e.g. 100D.

Nos. 300, 301

Cast iron case— $4 \times 2\frac{1}{4} \times 1$ inch

Backset..... $2\frac{1}{2}$ "

Operation

From outside by key. From inside by knob.

This latch has the one arm feature. By turning the key to the right the latch is automatically held back.

On the inside, bolt may be held back by turning knob to the left.

Nos. 030, 031, D030, D031

Cast iron case— $3\frac{1}{2} \times 2\frac{3}{4} \times 1$ inch

Backset..... $2\frac{3}{4}$ "

Operation

From outside by key. From inside by knob. Bolt may be held back by stop.

D030 and D031 may be deadlocked by stop so that the latch cannot be operated from the outside by the key.

Nos. 102, 103, D102, D103

Cast iron case— $3\frac{1}{2} \times 2\frac{3}{4} \times 1\frac{1}{16}$ inches

Backset..... $2\frac{1}{2}$ "

Operation

From outside by key. From inside by knob. Bolt may be held back by stop.

D102 and D103 may be deadlocked by stop so that the latch cannot be operated from the outside by the key.

Nos. 043, 044

Cast iron case— $3\frac{5}{16} \times 2\frac{1}{2} \times 1\frac{1}{16}$ inches

Backset..... $2\frac{1}{8}$ "

Operation

From outside by key. From inside by knob. Bolt may be held back by stop. Bolt may be given a second throw by key from outside or by turn-knob from inside, thus deadlocking it. Bolt can always be retracted by key or knob.

No.	Case	Bolt	Turn knob	Three keys	Finish

No.	Metal	Bolts	Key
72	Cast iron, japanned	Iron	97
73	Cast brass	Brass	97

Packed complete with screws.

Rim or box keepers supplied for inboard locks. Flat keepers supplied for outboard locks. When ordering specify hand and whether for inboard or outboard locks. Can be supplied with 2500PS or 2500WS knobs or knob and drop ring, see pages 75, 76. May also be supplied in ship finish. Can be master-keyed with 0203 locks.

One half dozen in a box with screws.

Nos. 72, 73

When ordering give list number and finish. For description of finishes see page 17.

LOCK STRIKES — CAST BRASS AND BRONZE

Hunt lip
strike

Hunt lip
protected
strike

Protected
strike

Box strike

Guarded
strike

No. 282
Electric strike or
opener. Operated
by push button.

Pusher No. 281
The action of the
pusher throws the
door open when
strike is released.

Hunt Lip Strike

The lip of this strike is made to conform to outline of casing. When ordering it is necessary to send full size detail of door jamb or casing, also thickness of door.

Hunt Lip Protected Box Strike

This strike, as its name indicates, is a box strike protected, and also conforms to the casing. Full size drawing should be submitted when ordering.

Protected Strike

As will be noticed by illustration, the flange on this strike prevents the forcing of any instrument through the door jamb, thus preventing the forcing of the latch bolt on door opening in. This strike can be furnished with any of our mortise locks. Specify thickness of door when ordering.

Box Strike

The advantage of this strike is that the wood is entirely covered and does not show through. This strike can be furnished with any of our mortise locks.

Guarded Strike

This type of strike is used only with locks which have recessed fronts. The construction of the strike and lock front is such that when they interlock, the latch bolt is guarded or protected against attack through the crevice of the door. Especially adapted for use upon doors opening out. Furnished regularly with all locks having recessed fronts. Specify hand of door.

Electric Strike or Opener — Operated by push button

No. 282—Iron case 4 x 2¼ inches. Front cast bronze 5⅞ x 1¼ inches. For latches Nos. 764, 857, 650, 651, etc.

A pusher is supplied with each strike.

Mortise

Packed one dozen in a box.

When ordering give list number and finish. For description of finishes see page 17.

CREMORNE AND SURFACE BOLTS

FOR DOORS OR WINDOWS OPENING IN OR OUT

Complete with guides and any length of rod, packed with screws to match

No. 590

No. 594

No. 595

No. 680

No. E812—For windows opening out. Knob outside, lever handle inside.

No. E813—For windows opening in. Lever handle outside, knob inside.

No.	Size	Box and guides material	Rod size	Rod material	Regularly furnished
590	6 x 1 1/4"	Cast brass	5/8"	Wrought brass	Half oval, 7'
594	6 1/2 x 1 1/4"	Cast brass	5/8"	Wrought brass	Half round, 7'
595	6 1/2 x 1 1/4"	Cast brass	5/8"	Wrought brass	Half round, 7'
680	4 3/4 x 3/4"	Cast brass	3/8 x 3/16"	Wrought brass	Square, 7'
E812	6 x 1 1/4"	Cast brass	1/2"	Wrought brass	Half oval, 7'
E813	6 x 1 1/4"	Cast brass	1/2"	Wrought brass	Half oval, 7'

When ordering specify height of door or window and width of stile; also distance from bottom to desired centre of lever or knob handle. State whether window or door is recessed or flush and opens in or out. For windows or doors opening out use lever handle and specify hand. Angle,

flat and cup strikes can be furnished to suit various conditions.

The stop on Nos. E812 and E813 deadlocks knob and turn and cannot be operated from either side.

SPECIAL STRIKES FOR CREMORNE BOLTS

No. 1—Strike with long lip
For windows opening in when bolt is placed on 1/2-inch astragal.

No. 2—Angle strike
For windows opening out, rabbeted sill and top.

No. 3—Reversible flat strike
For windows opening out and in.

No. 4—Lip strike
For windows opening in

Above strikes can be supplied, without extra charge, in place of the strikes shown with the Cremorne and Surface Bolts.

When ordering give list number and finish. For description of finishes, see page 17.

FIRE EXIT LATCHES

PETERBORO

SELF-RELEASING FIRE EXIT LATCHES CAST BRASS, IRON JAPANNED OR PLATED

Nos. G300, G300A, J300, J300A
Designed for theatre, school or hotel fire escapes.

Nos. G400, G400A, J400, J400A
Designed for school-house class room door to corridor.

No. G500
Designed for school-house, church, public building entrance and exit, auditorium or assembly hall corridor door. Equipped with concealed dogging device

Featured to unlatch latch bolt from inside by touch against bar at any point.

Side view showing Nos. G300A and J300A.

With latch No. 620A.

Panic bar inside.

No outside trim.

Can also be supplied with latch No. 620. Listed in sets as G300 and J300.

Side view showing Nos. G400A and J400A.

With latch No. 620A.

Panic bar inside.

B0770 grip outside.

Can also be supplied with latch No. 620. Listed in sets as G400 and J400.

Side view showing No. G500.

With lock No. A859.

Panic bar and cylinder inside.

B0770 grip and cylinder outside.

Inside cylinder and outside cylinder keyed differently unless otherwise specified.

Latch No. 620. For function see page 68.

Latch No. 620A. For function see page 68.

Lock No. A859. For function see page 57.

Handle No. B0770. Other design handles can be supplied.

Dogging device No. G-26. Cast brass, Size 4" x 1 1/2".

No.	Material	Size end plates	Cross bars 7/8"	Finish
G300	Cast brass	7 x 2"	Wrought brass tubing	Polished
G300A	Cast brass	7 x 2"	Wrought brass tubing	Polished
J300	Cast iron	7 x 2"	Wrought steel tubing	Japanned
J300A	Cast iron	7 x 2"	Wrought steel tubing	Japanned
G400	Cast brass	7 x 2"	Wrought brass tubing	Polished
G400A	Cast brass	7 x 2"	Wrought brass tubing	Polished
J400	Cast iron	7 x 2"	Wrought steel tubing	Japanned
J400A	Cast iron	7 x 2"	Wrought steel tubing	Japanned
G500	Cast brass	9 1/4 x 2"	Wrought brass tubing	Polished

J300 and J400 series can be supplied in plated finishes.

When ordering state width, height, width of stile, thickness and hand of doors required.
Above bolts can be furnished for stock in standard size of 36 inch width.

When ordering give list number and finish. For description of finishes, see page 17.

PANIC DOOR BOLTS

DESIGNED FOR THEATRE, SCHOOL, HOTEL, OFFICE BUILDING
AND FIRE TOWER EXITS ONLY

Nos. 577, 578
No outside trim.

Has top and bottom bolting feature. No hardware on outside of door. Push bar on inside, featured to disengage bolts from inside by pressure against bar at any point, at same time permitting door to open outward. Cross bar will close or release bolts.

Nos. 579, 580—For double doors.
No outside trim.

Application Nos. 577, 578.
No outside trim.

Inside application of combination set. **G500**
on active leaf, and 577 or 578 on inactive leaf.

Application Nos. 579, 580. No outside trim.

When ordering specify hand; state whether door is hung on right or left hand side when viewed from the inside. Close the door and measure height and width on the inside, and width of stiles, and state if floor is wood or stone, and if head is flush or projecting. Whenever possible send sketch.

No.	Material	Cross bar	Vertical rod	Application
577	Cast brass	$\frac{7}{8}$ " brass tubing	$\frac{1}{2}$ " brass	For single door
578	Wrought iron, japanned	$\frac{7}{8}$ " steel tubing	$\frac{1}{2}$ " steel	For single door
579	Cast brass	$\frac{7}{8}$ " brass tubing	$\frac{1}{2}$ " brass	For double doors
580	Wrought iron, japanned	$\frac{7}{8}$ " steel tubing	$\frac{1}{2}$ " steel	For double doors

Nos. 578 and 580 can be supplied sprayed dull brass, aluminum or plated.

Above bolts can be furnished for stock in standard size of 8 feet 6 inches in length, 3 feet in width.

When ordering give list number and finish. For description of finishes, see page 17.

SPECIFICATION OF BUTTS FOR WOOD, HOLLOW METAL AND KALEMEIN DOORS

Door dimensions	Size of butts
$\frac{3}{4}$ " and $\frac{7}{8}$ " cupboard doors (wood) up to 24" wide.....	2½"
$\frac{7}{8}$ " and 1½" screen doors (wood) up to 36" wide.....	3"
1½" doors (wood) up to 36" wide.....	3½"
1½" doors (steel) up to 36" wide.....	4 x 4"
1¼" and 1⅜" doors (wood) up to 32" wide.....	3½"
Over 32" to 37" wide.....	4"
1¼" and 1⅜" doors (steel) up to 32" wide.....	4½"
1⅞", 1¾" and 1⅝" door (steel or wood) up to 32" wide.....	4½"
Over 32" to 37" wide.....	5"
Over 37" to 43" wide.....	5" extra heavy
Over 43" to 50" wide.....	6" extra heavy
Over 43" to 50" wide.....	6" extra heavy
2", 2¼" and 2½" doors (steel or wood) up to 37" wide.....	5" extra heavy
Over 37" to 43" wide.....	5" extra heavy
Over 43" to 50" wide.....	6" extra heavy

On butts where two dimensions are given the first always indicates HEIGHT (not including the tips) and the second WIDTH. Thus 4 inches x 3 inches is 4 inches high and 3 inches wide when open.

For specifications of butts for various types of doors see table above.

Three butts to a door are recommended for all doors except light cupboards, extra large doors four butts.

Heavy butts should always be used on doors where heavy service is expected.

Wrought bronze doors weigh about 50 per cent. more than steel doors and require heavier butts.

2 x 2-inch and 2½ x 2½-inch, three pair in a box; larger sizes one pair. Complete with screws.

Irregular sizes brass butts prices on application.

LOOSE JOINT, TRANSOM AND ASYLUM BUTTS

METHOD OF DETERMINING HANDS OF LOOSE JOINT BUTTS

Left hand
Loose joint butt

Right hand
Loose joint butt

Left hand butt

Right hand butt

The hand of a butt is determined from the outside of the door to which it is applied. The outside of a cupboard, bookcase or closet door is the room side. For other doors the outside is usually the "push" or jamb side.

- If, standing outside of a door which opens from you the butts are on the right, it takes right hand butts; if on the left, it takes left hand butts.
- If, standing outside of a door which opens toward you the butts are on the right, it takes left hand butts; if on the left, it takes right hand butts. Reversed doors are doors opening out.

To determine immediately the hand of a loose joint butt, hold the butt with the barrel toward you. The direction in which the groove extends determines the hand of the butt.

In ordering butts that are not reversible, the hand of the butt must always be specified.

ASYLUM BUTTS

Can also be supplied in ball bearings, and fibre washer at the same price as the ball tip butts in corresponding sizes.

DOUBLE ACTING FLOOR HINGE No. 465

Ball Bearing

No.	Metal	For doors
465	Wrought steel, plated	1 ⅜" - 1 ¾"

No. 465 Hinge has positive smooth compression spring action. The side plates are reversible. This permits using stock goods when different finishes are required to match other hardware in the rooms on either side of the door.

The screw slots in the floor plate serve as means for proper alignment of the door.

Packed one set in box, with screws.

When ordering give list number and finish. For description of finishes, see page 17.

DOOR STOP—This stop, used in connection with a door check, provides a most satisfactory substitute for the double acting spring hinge so commonly used on double doors. It permits each door to be opened one way only, compelling travel to the right, and making impossible the confusion and accidents so liable to occur where heavy doors swing both ways. Specify thickness of door.

No.	Dia. of Base	Height	Metal	No.	Dia. of Base	Height	Metal

LAVATORY SPRING PIVOT HINGES BALL BEARING

For doors on marble, slate or wood partitions, and also made for pipe standards. For either single or double action right or left hand with alignment feature also to hold door closed or open as desired. Can be furnished for any thickness of marble up to two inches and are supplied with open head nuts. Closed head can be furnished if required. This hinge has adjustable tension which can be altered when the door is hung and is suitable for heavy double action or wide single action doors.

No.	Material	Finish
3513	Bronze	Nickel plated

Always state thickness of hanging stile and door.

LAVATORY GRAVITY PIVOT HINGES

For lavatory doors on marble, slate or wood partitions. For either single or double action right or left hand with alignment feature, also to hold door open or closed if desired. Can be furnished for any thickness of marble up to two inches. This gravity hinge is simple in construction, using ball bearing hardened steel rollers.

No.	Material	Finish
3514	Bronze	Nickel plated

When ordering state if wanted for right or left hand doors and if opening in or out. Always state thickness of hanging stile and door.

Above sets are packed complete one set in a box with bolts and screws to match.

Can also be supplied in chrome plate or other finishes if desired.

LAVATORY HINGES

No. 1600
Lavatory door bumper
Cast bronze nickel plated.
Projection 1 3/4 in. buffer
and plunger. Plate 2 in.
in diameter. Has rubber
cushion.

Nos. 2100, 2110
Heavy wrought metal
single acting hinge

Has adjustable tension. The coil spring is entirely enclosed and is made of the best oil tempered steel wire. The tension of the spring can be regulated after the hinge is applied to the door.

No.	
2100	Polished steel, nickel or chrome plated,
2110	Polished brass, nickel or chrome plated

SASH FASTENERS

Nos. 926, 4927

Nos. 921, 7921

Nos. 1926, 7926,
1925, 7925

No.	Size	Metal	No.	Case size without strike	Metal
926	2 1/4 x 1 3/4"	Cast brass	1926	1 x 2 7/8"	Cast brass
4927	2 1/4 x 1 3/4"	Cast iron, plated (rolled)	7926	1 x 2 7/8"	Cast iron, plated (rolled)
			1925	1 x 2 5/8"	Cast brass or bronze
			7925	1 x 2 5/8"	Cast iron, plated (rolled)
			921	3/4 x 1 5/8"	Cast brass, 1 and 12
			7921	3/4 x 1 5/8"	Cast iron, plated (rolled)

The size given includes the strike and does not include the projection of the ring which is 1 1/2 inches, making the size over all when in locked position 3 1/4 inches. This fast is operated with a window pole making it especially suitable for high windows in schools and other public buildings.

Mortise strikes furnished with Nos. 1926, 1925 type without any extra charge if desired.

One dozen in a box with screws.

CAR WINDOW FASTENERS

Three strikes for each fastener

No. 1924

No.	Size	Metal
1924	2 1/2 x 1 1/8"	Cast brass or bronze

One dozen in a box with screws. Extra strikes.

CAR AND SHIP FASTENERS

Eighteen inches of crimped brass furnished with each catch. Extra crimped brass, if desired.

This window and sash catch can be furnished either right or left, but right is always supplied unless otherwise ordered.

The great advantages of this catch over all others are that it will hold the sash at any point, and at the same time crowds the sash against the jam which does away with all noise and rattle.

No. 1923

No.	Finish	Size
1923	Cast bronze	1 3/4 x 1"

C3523	1 1/4 x 4 1/4"	Cast iron	Plated, rolled
D3523	1 1/4 x 4 1/4"	Cast iron	Plated, polished
Packed one dozen in a box with screws.			
3535	2 x 5 1/2"	Cast brass	Polished
3536	2 x 7"	Cast brass	Polished
Packed one dozen in a box with screws.			

BEAD SCREWS AND WASHERS

Nos. 4000-7000

Screw 1 inch. No. 8 R. H.
Wrought steel washer.

No.	
4000	Plated screw
	Wrought brass washer
7000	Brass screw
6000	Plated screw

TRANSOM LIFTERS

Reversible (not handed) — Opens any transom sash, with or without recess. Top, bottom, or pivoted—swinging—in or out. Regularly supplied—dull brass plated on steel.

No. 8-213—Main rod 3' 0"

No. 8-214—Main rod 4' 0"

When ordering give list number and finish. For description of finishes, see page 17.

CASEMENT FASTENERS

CAST NICOLIUM

Usually supplied in No. 22 Old Iron Finish or No. 23 Dull Dead Black Lustreless Iron. Can also be supplied in cast brass or bronze.

No.	Size back plate	Length handle centre rivet to end	Handle length over all	Projection of handle
688	2 5/8 x 1 1/4"	3 1/8"	4 1/2"	1 3/4"

Packed one dozen in a box

No.	Size	Material	No.	Size	Material
693	6 1/8 x 7/8"	Cast brass, open in	790	2 x 1"	Wrought brass
694	6 1/8 x 7/8"	Cast brass, open out	880	2 x 1"	Wrought brass

		3111½	Cast iron, plated steel rod
		3112½	Cast brass, polished brass rod

Packed half dozen in a box with screws.

When ordering give list number and finish. For description of finishes, see page 17.

FRICTION STAY No. 3301

RIGHT AND LEFT HAND, OPENING IN OR OUT

Right hand opening out

Left hand opening out

Right hand opening in

Peterboro Friction Stay No. 3301 has the following points of advantage over other types:

A minimum distance of 1 1/4 inches between sash and screen is all that is necessary.

The friction plate is attached by four widely-spaced screws to stool or trim—not to sash, and is at considerable distance from the butts—thus controlling sash with greater power and less strain on butts and sash.

The friction is developed by large (1 1/4 inches diameter) friction plates with brass washers between. The action is more even and constant from full open to closed position of sash than any other device. The friction is adjustable by means of slotted nut, but has a release at closing point which permits the sash to be easily closed.

Opening can be made up to 180 degrees.

The stay may be used on any sash, hinged or pivoted; and is attachable at top, bottom or side, either inside or out; and is not handed.

Friction holds the sash in any position desired.

The stays are steel heavily cadmium plated and as a double protection against rust may be painted to match the woodwork. Packed 12 in a box with round head screws. Weight 6 pounds per dozen.

INSTALLATION No. 3301 STAY

For 180° opening

Less than 180° opening

FRICTION TRANSOM STAY No. 3302

No. 3302 friction transom stay as shown in illustration to the left is adaptable for holding transoms open in any desired position. The open position of transom should never be over 90 degrees. The stay must never permit more than that opening. This is accomplished by attaching as far from the butts as possible. The stop on sash arm prevents more than 90 degree opening, and makes it impossible to go past dead centre. Heavy or wide sash should be equipped with two stays.

The stays are steel heavily cadmium plated and as a double protection against rust may be painted to match the woodwork.

Packed 12 in a box with round head screws. Weight 6 pounds per dozen.

Installation No. 3302 stay

When ordering give list number and finish. For description of finishes, see page 17.

One gross in a box, with screws.

COMBINATION DOOR FASTENERS

Wrought brass plate, F.H. brass screw, brass knurled nut.

No. 1145

Showing fastener
applied to door

No.	Size of plate
1145	1 1/4 x 5/8"

This fastener is the most practical on the market. It is not necessary to remove plate and screw in changing from screen to storm panel. A quarter turn of screw allows the plate to drop in line with stile so that the panel can be removed and replaced without removing the screw.

For doors 1 1/8 inch to 1 3/8 inch thick.

When ordering give list number and finish. For description of finishes see page 17.

THE LCN STANDARD SURFACE TYPE DOOR CLOSER

SCHEDULE OF SIZES

Applies to Standard Exposed Closers

LCN Closer with Regular Arm

100° Hold-open Arm

180° Hold-open Arm

MAXIMUM SIZES OF DOORS for which Closers are Recommended			CLOSER SIZES			Shipping Weight of Closer, Approximate
Interior Doors	Exterior Doors		With REGULAR Arm	With 90°-140° HOLD- OPEN Arm	With 140°-180° HOLD- OPEN Arm	
	OUT Swing	IN Swing				
2' 8"	Not Suitable	Not Suitable	B	B-H90	B-H180	10 lbs.*
3' 0"	2' 6"	2' 3"	C	C-H90	C-H180	14 lbs.*
4' 0"	3' 0"	2' 9"	D	D-H90	D-H180	16 lbs.*
4' 6"	3' 6"	3' 3"	E	E-H90	E-H180	21 lbs.*
5' 0"	4' 0"	3' 9"	F	F-H90	F-H180	22 lbs.*

NOTE:—The recommendations shown in table above are for doors subject to normal conditions. Where strong drafts are encountered, or where corner brackets locate the door closer more than $\frac{3}{4}$ " nearer the hinge than the normal mounting position, next larger size closer should be applied.

*Weight shown is for regular arm closer. Add 2 lbs. for hold-open arm closers.

Regularly supplied in Gold Bronze. Can also be supplied in Silver Bronze (Aluminum), Maroon Bronze and Dead Black, or any Plated Finishes when so ordered.

SOFFIT BRACKET—No. 10

Where opening requires closer applied on a bracket and conditions permit, we recommend the use of the soffit bracket as it places the closer out far enough from the hinge to allow the maximum leverage of arms to control the door.

Size of Base	
A-10...1 $\frac{3}{8}$ " x 3 $\frac{3}{8}$ "	D-10...1 $\frac{1}{8}$ " x 4 $\frac{3}{4}$ "
B-10...1 $\frac{3}{8}$ " x 3 $\frac{3}{8}$ "	E-10...1 $\frac{1}{8}$ " x 5 $\frac{1}{8}$ "
C-10...1 $\frac{3}{8}$ " x 4 $\frac{1}{8}$ "	F-10...1 $\frac{1}{8}$ " x 5 $\frac{1}{8}$ "

CORNER BRACKET—No. 11

* Used where closer is required to swing door 180° only, and where it is necessary to have head room clearance by placing closer in corner of the door frame.

Size of Base	
A-11...1" x 4 $\frac{1}{2}$ "	D-11...1 $\frac{1}{8}$ " x 5 $\frac{1}{8}$ "
B-11...1" x 4 $\frac{1}{2}$ "	E-11...1 $\frac{1}{8}$ " x 5 $\frac{1}{8}$ "
C-11...1 $\frac{1}{4}$ " x 4 $\frac{1}{8}$ "	F-11...1 $\frac{1}{8}$ " x 5 $\frac{1}{8}$ "

CORNER BRACKET—No. 16

Used with holder Arm giving 90° to 140° of hold open. Also with regular arm standard length to 140° of opening. Extra long arms required with this bracket for opening beyond 140°.

Size of Base	
A-16...1" x 5 $\frac{1}{2}$ "	D-16...1 $\frac{1}{4}$ " x 6 $\frac{1}{2}$ "
B-16...1" x 5 $\frac{1}{2}$ "	E-16...1 $\frac{1}{4}$ " x 6 $\frac{1}{2}$ "
C-16...1 $\frac{1}{4}$ " x 6 $\frac{1}{2}$ "	F-16...1 $\frac{1}{4}$ " x 6 $\frac{1}{2}$ "

CORNER BRACKET—No. 17

Used where separate Door Holding devices are required. This bracket lowers closer arms with other Holder Device.

Size of Base	
A-17...Not Made	D-17...1 $\frac{1}{4}$ " x 6 $\frac{1}{2}$ "
B-17...Not Made	E-17...1 $\frac{1}{4}$ " x 6 $\frac{1}{2}$ "
C-17...1 $\frac{1}{4}$ " x 6 $\frac{1}{2}$ "	F-17...1 $\frac{1}{4}$ " x 6 $\frac{1}{2}$ "

FLUSH BRACKET—No. 12

Used where head stop and jamb are not wide enough to permit use of the soffit bracket.

Size of Base	
A-12...2 $\frac{3}{8}$ " x 3 $\frac{1}{2}$ "	D-12...2 $\frac{3}{4}$ " x 4 $\frac{3}{4}$ "
B-12...2 $\frac{3}{8}$ " x 3 $\frac{1}{2}$ "	E-12...2 $\frac{3}{4}$ " x 4 $\frac{3}{4}$ "
C-12...2 $\frac{1}{2}$ " x 4 $\frac{1}{4}$ "	F-12...3" x 5"

UNIVERSAL SOFFIT BRACKET No. 15

Used on out swinging arch top doors and is adjustable to fit any spring of arch.

B-15...1 $\frac{3}{8}$ " x 4"	E-15...1 $\frac{3}{8}$ " x 4"
C-15...1 $\frac{3}{8}$ " x 4"	F-15...1 $\frac{3}{8}$ " x 4"

As sole representatives in Canada for L.C.N. Closers, Inc., we would appreciate any inquiries for any of the Overhead Concealed or Concealed in door Closers. A special catalogue covering these will be mailed on request.

When ordering give list number and finish. For description of finishes, see page 17.

LCN FUSIBLE LINK CLOSER

Replaces Old Chain and Weight Method of Closing FIRE DOORS
Dependable, Fast, Positive—Cannot Fail

LCN PARTS

HOSPITAL TYPE CLOSER

Holds Door Open at Any One of Three Points

A standard LCN Exposed Closer with a special hold-open arrangement designed to hold the door open at any one of three points—at about 10° at 45° and at 90° to 140° (latter position adjustable).

When arm is released from the set position, closer will always close and latch the door. It is noiseless and positive in action. Made in size D only.

When ordering give list number and finish. For description of finishes, see page 17.
